

My Life as a Water Drop

Fifth Grade – Science – SY16/17

Daniel of St. Thomas Jenifer Elementary

"My Life as a Drop of Water"

Directions: Based on the journey you completed on the front, write a creative story about your journey. It will be a story about your life as a water drop. Make your water drop come to life!! Be creative! Have Fun!!

Hey there! My name is Leilah. I am a water molecule. I go through many cycles in my life as a water molecule. In my last cycle I started off in a plant. I stayed there for 2 months. Then the plant with me included was eaten by a rabbit. Then I ended up in a cloud. That cloud put me in a glacier. That glacier melted, transferred me to a river. From there I went back into a animal. That view was nasty and scary. Next I came out of the back end of the animal, what I came out as evaporated and I was back in another cloud with my friends. After that, in a couple days it rained and there I was a molecule in one of the great lakes. This is only $\frac{1}{3}$ of this cycle. You never know, one day you might be a part of one of my cycles. Did you enjoy this part of my previous cycle? Thanks for reading!

One day, I had a very big
adventure. I was already evaporated
and in the sky floating over
an ocean. Until one day I was
condensed and fell into the
ocean as a water
droplet. I saw many different
animals from friendly to
deadly. I have lost many
droplet friends. Finally I
had evaporated again, but
this time I had become
a hurricane. Finally I
fell as a raindrop and
splashed and my time was
up. My friend Molly G survived,
then :D

Hi my name is Jeffy and I want
to tell you about my last cycle. OK
first me and my other friends started at
cloud station, right when I was getting
used to it I condense and fall into a
lake. me and my friends like the flow
of the lake when we flow in to
a river. The river was fun but when
me and my friends finally settled we started
to get lots of energy and started getting hot
when we evaporate in to the clouds,
~~that's when~~ I haven't been in the
clouds in 12 months. Just as I went
to bed I condense except this time I
stayed at the ocean. I stayed at the
ocean for another year and friends came
and went, when I finally evaporated
back to the clouds, well that
was my last cycle now I'm starting a new one.

I am a water molecule and
My name is Chubby. My adventure
started in the ^{Bunny} ocean and it was
a quite interesting adventure
because I was floating everywhere.
The water was evaporating from the
ocean, the sun was taking me in and
I was connecting to the clouds
then I dropped into the soil.
I was so tired because I
was in the clouds for like
25 mins. I was like let me and
my friends come down so then
after that I was floating back
into the ocean. The ocean pushed
me right back into the sandy
soil. That was a long adventure
let's do it again

Hi! I am a cloud. As I condensed into water
a froze and joined a glacier. Then as the
sun came out and melted me and my
friends. As we fell into the ground we
soaked in the dirt and followed the rest
of us. Then all of a sudden we went
to a river flowing down stream off
a cliff and back in. I get eaten and
got back out in the sun, shining
flaming hot heat on me turning me
back into a cloud. As my cloud gets
wet, I fall. Fall into a lake ~~drank~~
by an animal and released in the soil,
and sucked up by a plant looking for
food. As I reach the leaf I am released
as water vapor and turned into a
cloud for 2 more years. Then I starts
all over again.

and into ground for 2 months
and into ground for 2 months

I woke up and felt the cold river water, I rose up to the surface and a huge tornado storm! By the way I'm ree-ver and I was in trouble. All me and my friend Molly Q were swishing around. I was pushed on surface and I was left there, Molly Q was never seen. I dissolved in the ground and I was in ground water. I then were leaded back to the river! Next morning I was killing in the water when a Deer drank me up! Later in the deer farted and I was in a cloud. It started raining and I was splashed into soil when everything went black. I was underground, then again I was in the river. And I went deep into soil. The soil was weird I was inside a plant! I was watching inside when the water was pushing me under the plant. After that I came out as a gas and a cloud picked me up and took me to a glacier, I stood there, cold. I was lost nowhere to go, I was scared, wheres Molly!

I made it out of the glacier and managed to get into the ground water then I got back to the river and then a whale drank me and I got shot up into clouds. 2 days later..... I was in the cloud, I was pushing my way out and I fell into the ocean. I found Molly Q! We found each other after the long way.

I started off in the ocean
For a long time, I was
getting use to it. then one day
I glide off to a lake
All my friends were with me. By
the way my name Annie.
Then I moved to the clouds
It was fun. We could not
really move a lot. I moved
to the glacier It was
cold so I could not
move. I was happy were
I was. But then I
moved to the ground.
I stayed there for about
5 years. It took a long
time. me and my friends we

could move around, So we
played, then I went to a
river For 2 years. It was very
fun. then I went to a Animal,
then I went to a cloud that
was the end of my Journey.

You know that I Lived
in the Ocean For 18 Years I
lived behind a glacier. One day a
Seal ate me and throw up me and
I went to the clouds and went straight
in the ground and a plant grows out of the soil
throws in in the river. Then I went
through the glacier and went to the
river. Then

I started in a different place. I started off in the ocean then when the water got warm, I turned in to a gas. I got more energy then me and so molecules got together into a rain drop when we hit the ground I turned into gas again then I dropped back into the ocean then I went into a tube that pulled me into the river then I was thinking about what my next adventure was going to be and I hope it is going to be better then this one. and hopefully it will be my best adventure I have ever had. I will have more friends on my next adventure and I hope I can do the
